Throughout this report 'South East' refers to the combined figures for South East LA's who have provided data. Where the IDACI score for the South East is shown, this will have been re-calculated to include only those LA's who have provided data for the indicator shown. Therefore the South East IDACI score may vary throughout the report.

You can now toggle LA's on and off the charts by using the tick boxes on each page- this will only affect the active section. r-squared values are now included on the vs. IDACI charts.

Please click the icon below to go to the home page:

You can click the  icons to navigate through the document - there are also links from the homepage to each section.

Below is a summary comparison of the main indicators from this report- a full list of indicators can be found here: →

Information about Participating LA's can be found here: →

Information about Income Deprivation Affecting Children Index (IDACI) can be found here: →

Information about Population Estimates used in this report can be found here: →

IDACI (Income Deprivation Affecting Children Index)

Throughout this report, various indicators are plotted against the IDACI score of the Local Authority. The most recent IDACI figures were produced in 2019 using mid-2015 population estimates. The IDACI score represents the percentage of dependent children (non-prisoners) aged 0–15 living in income-deprived households. Where the IDACI score for the South East is shown, this will have been re-calculated to include only those LA's who have provided data for the indicator shown. Therefore the South East IDACI score may vary throughout the report.

*National Reoffending is measured by the Ministry of Justice using PNC data. From October 2017 the MoJ have changed the way reoffending is measured. They are now measuring a cohort of young people who offend within a 3 month period and track them for 12 months. The new measure produces an increase in the rate of reoffending as there is an inbuilt over-representation of prolific young offenders. Previously a prolific young offender would only be counted once in the 12 month cohort they could now be counted up to four times. The MoJ predict that this will lead to a 4-5 percent increase in the reoffending rate.
