Throughout this report 'South East' refers to the combined figures for South East LA's who have provided data. Where the IDACI score for the South East is shown, this will have been re-calculated to include only those LA's who have provided data for the indicator shown. Therefore the South East IDACI score may vary throughout the report.

You can now toggle LA's on and off the charts by using the tick boxes on each page- this will only affect the active section. r-squared values are now included on the vs. IDACI charts.

IDACI (Income Deprivation Affecting Children Index)

Throughout this report, various indicators are plotted against the IDACI score of the Local Authority. The most recent IDACI figures were produced in 2015 using mid-2012 population estimates. The IDACI score represents the percentage of children aged 0–15 living in income-deprived households.

Where the IDACI score for the South East is shown, this will have been re-calculated to include only those LA's who have provided data for the indicator shown. Therefore the South East IDACI score may vary throughout the report.
