Select your LA here to highlight throughout the report:

(None)

You can now toggle LA's on and off on the charts by using the tick boxes on each page- this will only affect the section in which the tick boxes are located.
Where heat mapping is used to colour the tables this is done for each LA's data (i.e. in rows) and higher values are represented by darker colour.
As previously requested, r-squared values have been included on the vs. IDACI charts.
Where the IDACI score for the South East is shown, this will have been re-calculated to include only those LA's who have provided data for the indicator shown.
